COMPUTER ENGG DEPARTMENT

NOTICE

BE SEM VII PROJECT-I

The expected outcome of BE Sem VII Project is Proposed system /Framework / Algorithm along with implemented pre-processing task.

Following are the steps which you all need to perform during this period :

1. Define your Input and output for your project
2. Download the benchmark dataset/ Gather Dataset/ Generate Dataset based on requirements depending on type your project.
3. By analysing Dataset and offered solutions in literature, proposed the algorithm for your project.
4. Implement preprocessing tasks.

At the end of VII Semester a project report should preferably contain at least following details: -

- Abstract
- Introduction
- Literature Survey
 1. Survey Existing systems
 2. Limitation Existing systems or research gaps
 3. Problem Statement and Objectives
 4. Scope
- Proposed System
 - Analysis/Framework/ Algorithm
 - For each component of framework/Algorithm
 1. Design details
 2. Input Output Design
 3. Methodology (your specific approach to solve the problem)
 - Implementation
 - Dataset Description
 - Preliminary Results
 - Summary
